SeaGard® Marine Overlay Finish

Dramatically improves the wet abrasion resistance of polyester & nylon

SEAGARD® MARINE OVER FINISH IS ENGINEERED TO MINIMIZE WET YARN-ON-YARN ABRASION. THIS ENSURES THE MAXIMUM STRENGTH OF A MOORING LINE IS RETAINED OVER ITS ENTIRE LIFETIME. IF YOUR APPLICATIONS ARE HEAVY MARINE AND DEMAND LONG-TERM DURABILITY, BE SURE TO SPECIFY SEAGARD® FIBER.

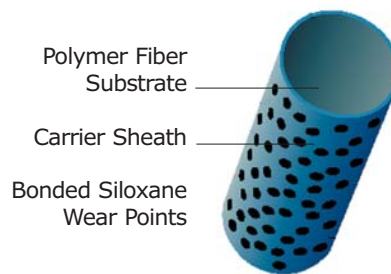

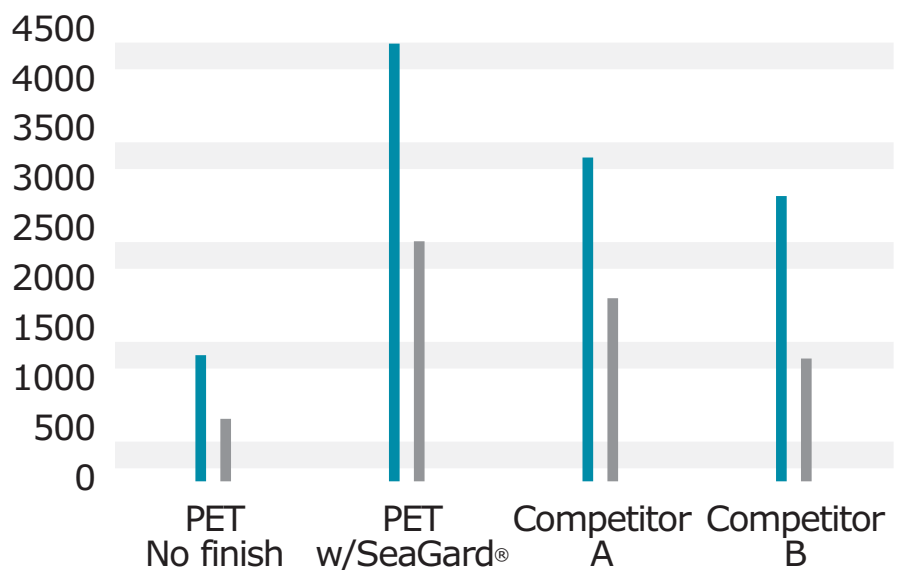

FOR PEAK WET & DRY PERFORMANCE

SeaGard® marine finish is a siloxane based overlay finish that forms a very durable polymeric network on the surface of the fiber. When a fiber is coated with SeaGard® finish it will exhibit a dramatic improvement in wet yarn-on-yarn abrasion resistance. The result is less fiber-to-fiber wear. The overall benefit to the mooring line engineer/user is a mooring line that will retain its original strength for a much longer period of time.

Marine Application

- Offshore Mooring Lines:
 - Production Platforms:
 - FSPO:
 - MODU:
- Tanker Mooring Lines & Pedants
- Tug Boat, Hawser & Head Lines
- Pleasure Marine Mooring Lines

Abrasion Resistance ■ Wet ■ Dry

Synthetic ropes and cables for mooring deepwater drilling, exploration and production structures
